**Official Average Guide compiled from the 2006-2007
certified Winter League Season**

Book Averages (reported as of April 15, 2007)

The HIGHEST average listed for a bowler is the official book average.

A minimum of 21 games is needed to establish a book average in a sanctioned league, except in the case of those leagues that bowl only 2 games each session. In this event, 14 games will be needed to establish a book average.

Averages are listed for each sanctioned league bowled. Those averages listed with less than the minimum number of games receive an *. Averages for bowlers who participated in 21 games or more in Summer Leagues, that had no official average in the Winter Season will be taken as of August 15, 2007 and will be maintained in the office of the association.

Please be sure to read all league and tournament rules carefully for the entering average requirements. Some events use current league sheet averages.

The bowlers & coaches (for youth) are responsible for reporting the correct average when entering an event.

Disqualification can occur for not reporting the correct average.

Average errors in this guide may be caused by various reasons beyond the association's control. It remains the individual's responsibility to know, and state the correct average where requested. Any errors in averages should be reported to the Association Office.
